

Game Project on Trello

Set-up your game development project on Trello

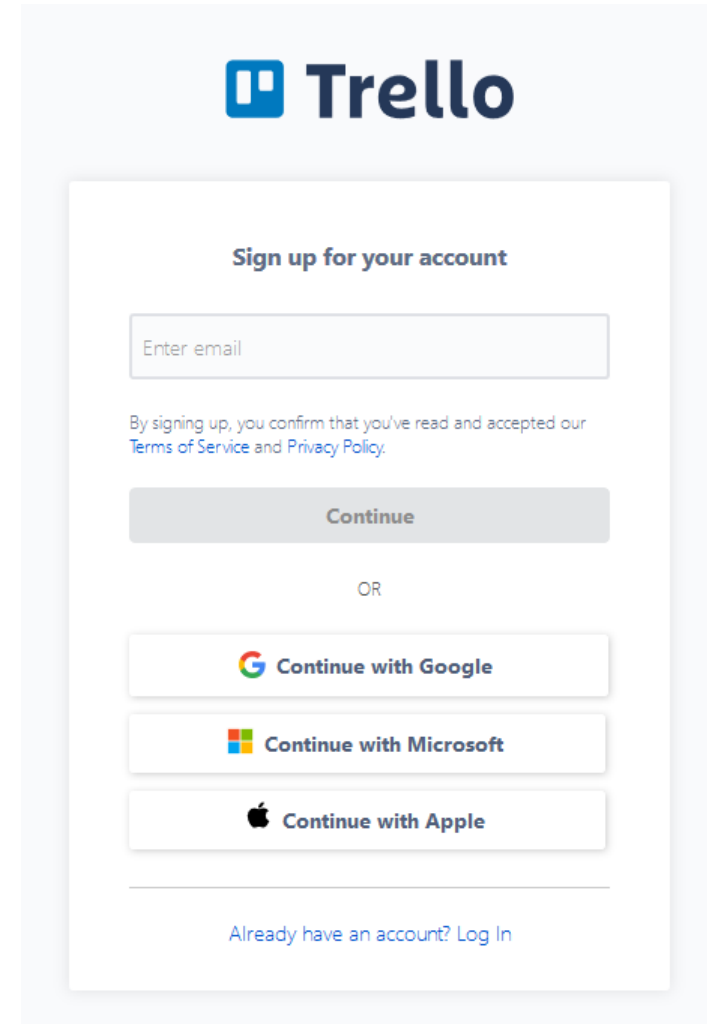

Join Trello

If you haven't done that already, create an account on Trello.

Easiest way is to use your personal Gmail account to sign up.

All team members must have a valid Trello account. (Don't worry, it's free!)

<https://trello.com/signup>

The image shows the Trello sign-up page. At the top is the Trello logo. Below it is the heading "Sign up for your account". There is a text input field labeled "Enter email". Below the field is a line of text: "By signing up, you confirm that you've read and accepted our [Terms of Service](#) and [Privacy Policy](#)." Below this is a grey "Continue" button. Underneath the button is the word "OR". Then there are three buttons for social login: "Continue with Google" (with the Google logo), "Continue with Microsoft" (with the Microsoft logo), and "Continue with Apple" (with the Apple logo). At the bottom, there is a link: "Already have an account? [Log In](#)".

Create a Workspace

A workspace on Trello is quite simply your “team”.

Your team leader should create a workspace. The name of your workspace must be “Project [Game Title]”.

For example: Project Among Us.

Let's build a Workspace

Boost your productivity by making it easier for everyone to access boards in one location.

Workspace name

This is the name of your company, team or organization.

Workspace type

Other

Workspace description Optional

Our team organizes everything here.

Get your members on board with a few words about your Workspace.

Continue

Add Your Friends

Invite all team members to the workspace.

And don't forget to add your tutor too!

Tip: Use commas to add more e-mails

Invite your team

Trello makes teamwork your best work. Invite your new team members to get going!

Workspace members

student1@polytechnic.bh X

student2@polytechnic.bh X

student3@polytechnic.bh X |

Pro tip! Paste as many emails here as needed.

Invite to Workspace

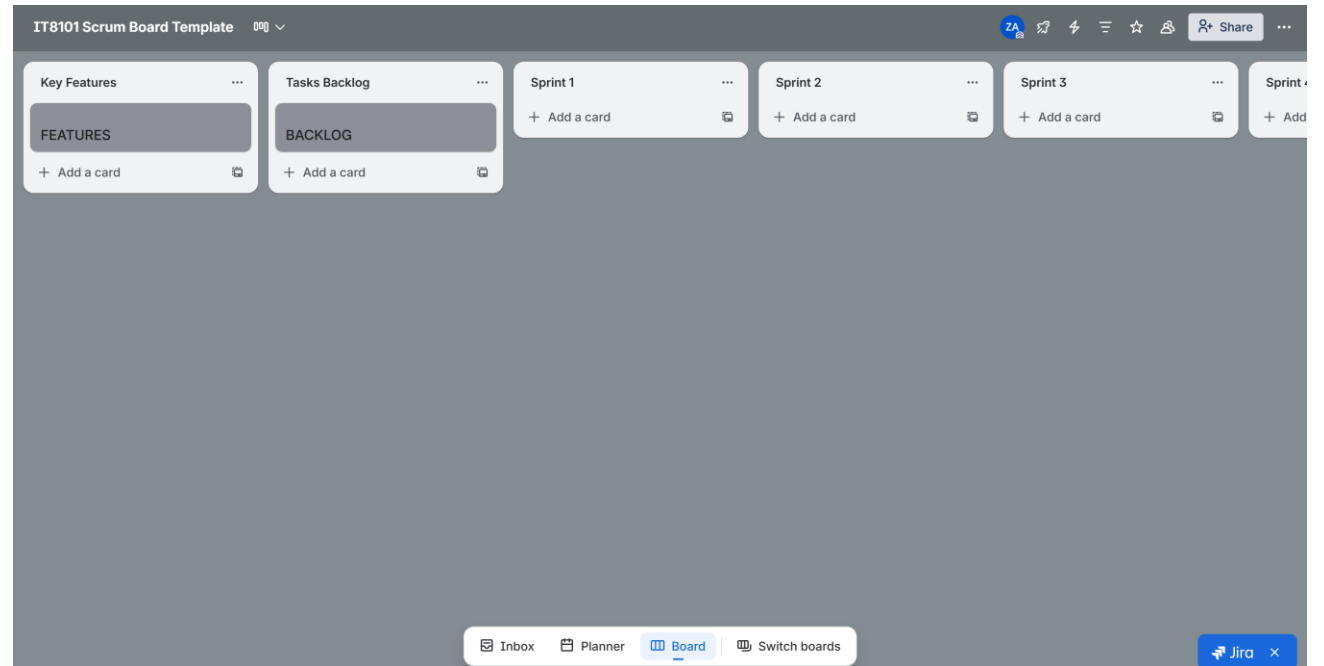

[I'll do this later](#)

Set-Up Main Board

A board in Trello is where you organize your tasks and collaborate with your team.

Create a board using the exact SCRUM template provided. Your board must include:

1. Key Features List
2. Tasks Backlog List
3. 8 Sprint lists (Sprint 1 → Sprint 8)

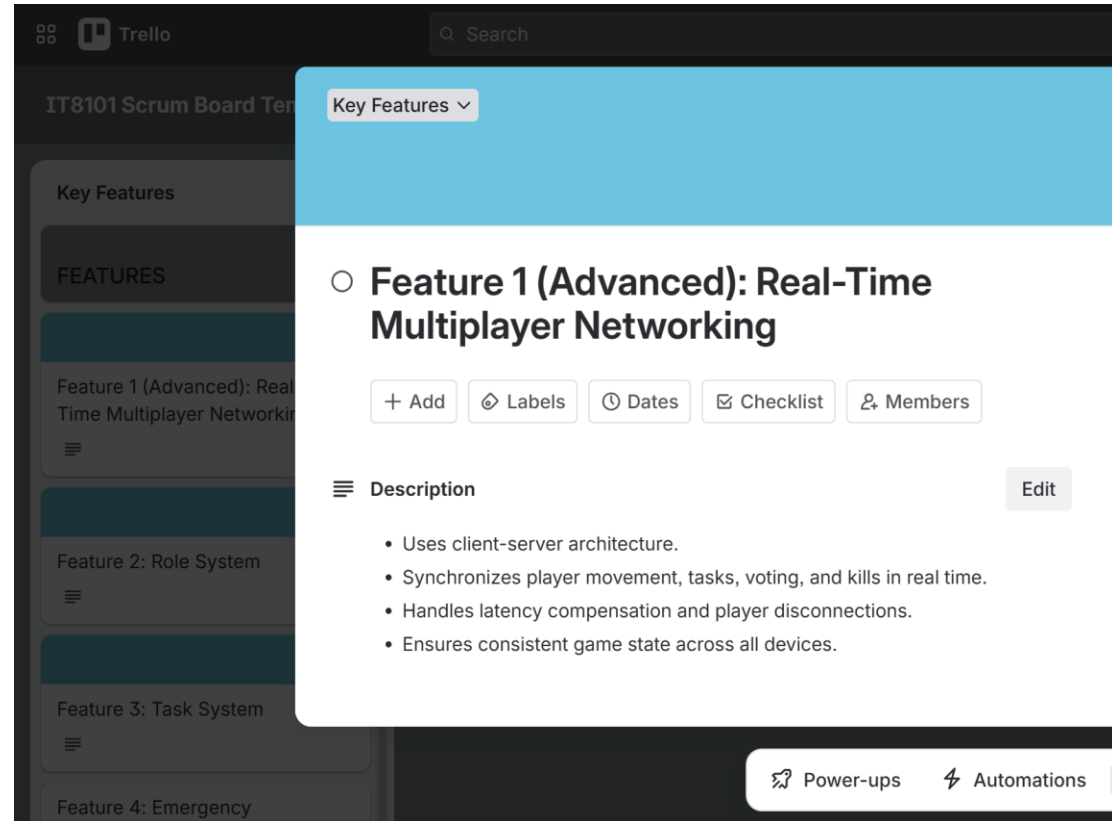

Define Key Features

Under **Key Features**, you must come up with unique features for your game, and clearly list them as separate cards. These features will later be broken down into implementation tasks.

⚠ Important:

- Features stay in the Key Features list
- They do NOT move to other lists
- Only tasks move to sprint lists

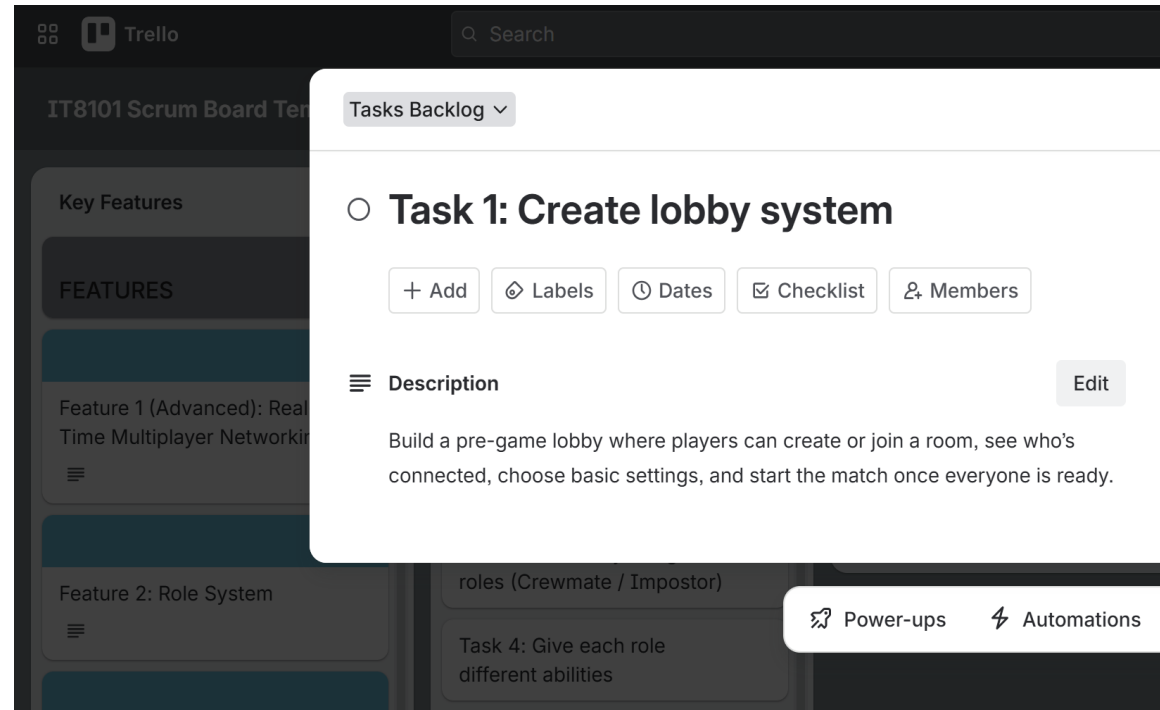

Tasks Backlog

Under **Tasks Backlog**, you must create tasks that implement:

- All features listed under Key Features
- All main requirements mentioned in the project document

This is where the actual work gets defined

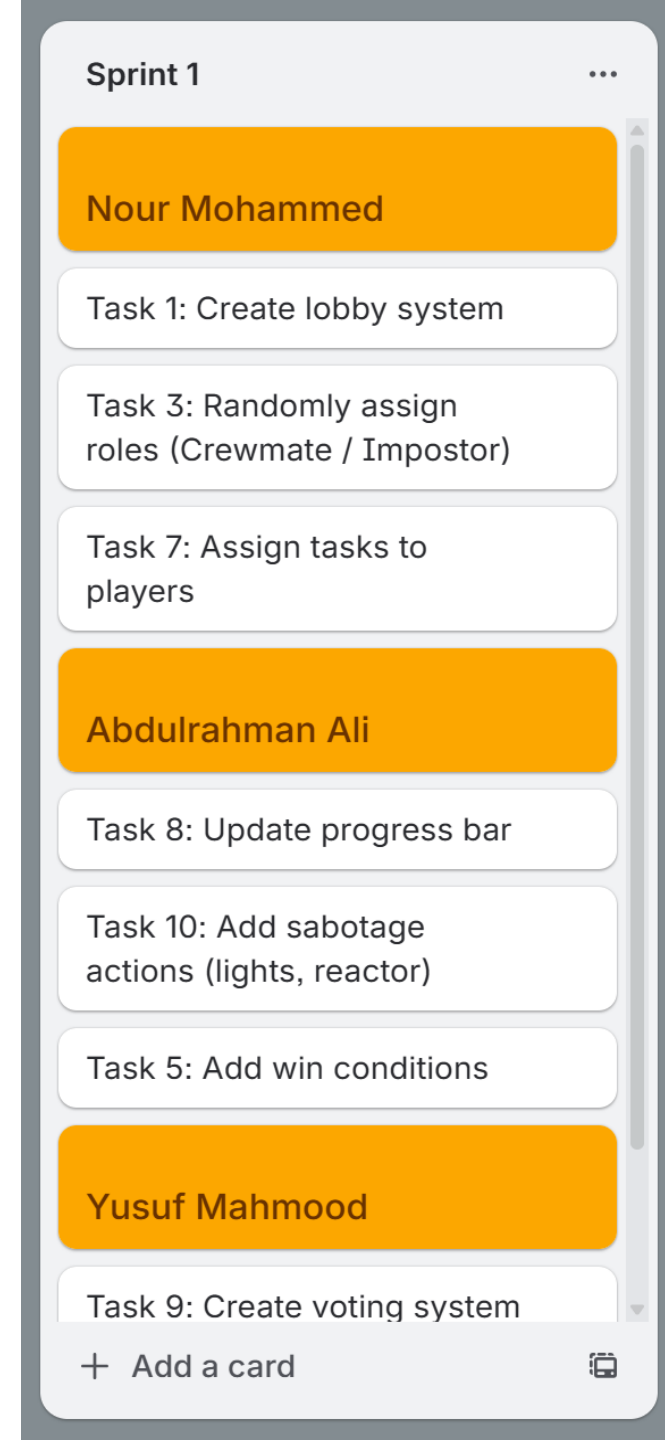

Sprints

For each sprint:

- Move relevant tasks from the backlog
- Assign tasks to team members
- Clearly show who worked on what

If your name never appears in a sprint...
we'll have questions

You're all set!

Happy Game Making
